

THEORIES CONT.; **ETHICAL ISSUES**

CHAPTER 3 & 4

LEARNING THEORIES

- How Learning Theories differ from Trait & Factor:
 - a) Focused on the learning process that led to your beliefs and values (thus impacting career choice)
 - b) Not concerned with any developmental stages
 - c) Factors that lead to career choice and adjustment are all learned.

LEARNING THEORIES

Krumboltz's Social Learning Theory

1) Genetics/special abilities

- Inherited qualities that may set limits on individual career opportunities

2) Environment/events

- Factors of influence that are often beyond the individual's control
- Certain events and circumstances influence skills development, activities, and career preferences

3) Learning experience

- Instrumental learning experiences and associative learning experiences
- Instrumental learning – acting on the environment to produce certain consequences.
- Associative learning- learning by reacting to external stimuli

4) Task approach skills

- The skills an individual applies to each new task or problem

LEARNING THEORIES

Krumboltz's Social Learning Theory

SOCIAL LEARNING THEORY GOALS FOR CAREER COUNSELING

- Emphasis on learning
- Facilitate the learning of skills, interests, beliefs, values, work habits, and personal qualities that enable clients to create a satisfying life within a constantly changing work environment, learning about self and the environment
- Three criteria that influence goals of career counseling:
 - a) People need to expand their capabilities and interests, not base decisions on existing characteristics only
 - b) People need to prepare for changing work tasks, not assume that occupations will remain stable
 - c) People need to be empowered to take action, not merely be given a diagnosis

LEARNING THEORIES

Krumboltz's Social Learning Theory

SOCIAL LEARNING THEORY GOALS FOR CAREER COUNSELING

- Students who take advantage of learning opportunities presented to them are better decision makers.
- This theory displays incredible merit to disenfranchised & marginalized groups in society. Applicable to people who fear discrimination.

LEARNING THEORIES

Social Cognitive Career Theory

- Bobo Doll experiment
- <https://www.youtube.com/watch?v=hHHdovKHDNU>

LEARNING THEORIES

Social Cognitive Career Theory

- 1) Environment highly influences people
- 2) Career exploration influenced by direct & indirect variables
- 3) People interested in things they believe they can perform well in.
- 4) Performance affected by ability, expectations, self-efficacy, and goals.
- 5) Self-Efficacy
 - a) Influenced by gender, ethnicity, health, special needs, etc.
- 6) Career exploration influenced by 4 internal aspects:
 - a) Behavior
 - b) Self-Efficacy beliefs
 - c) Outcome expectations
 - d) Goals

LEARNING THEORIES

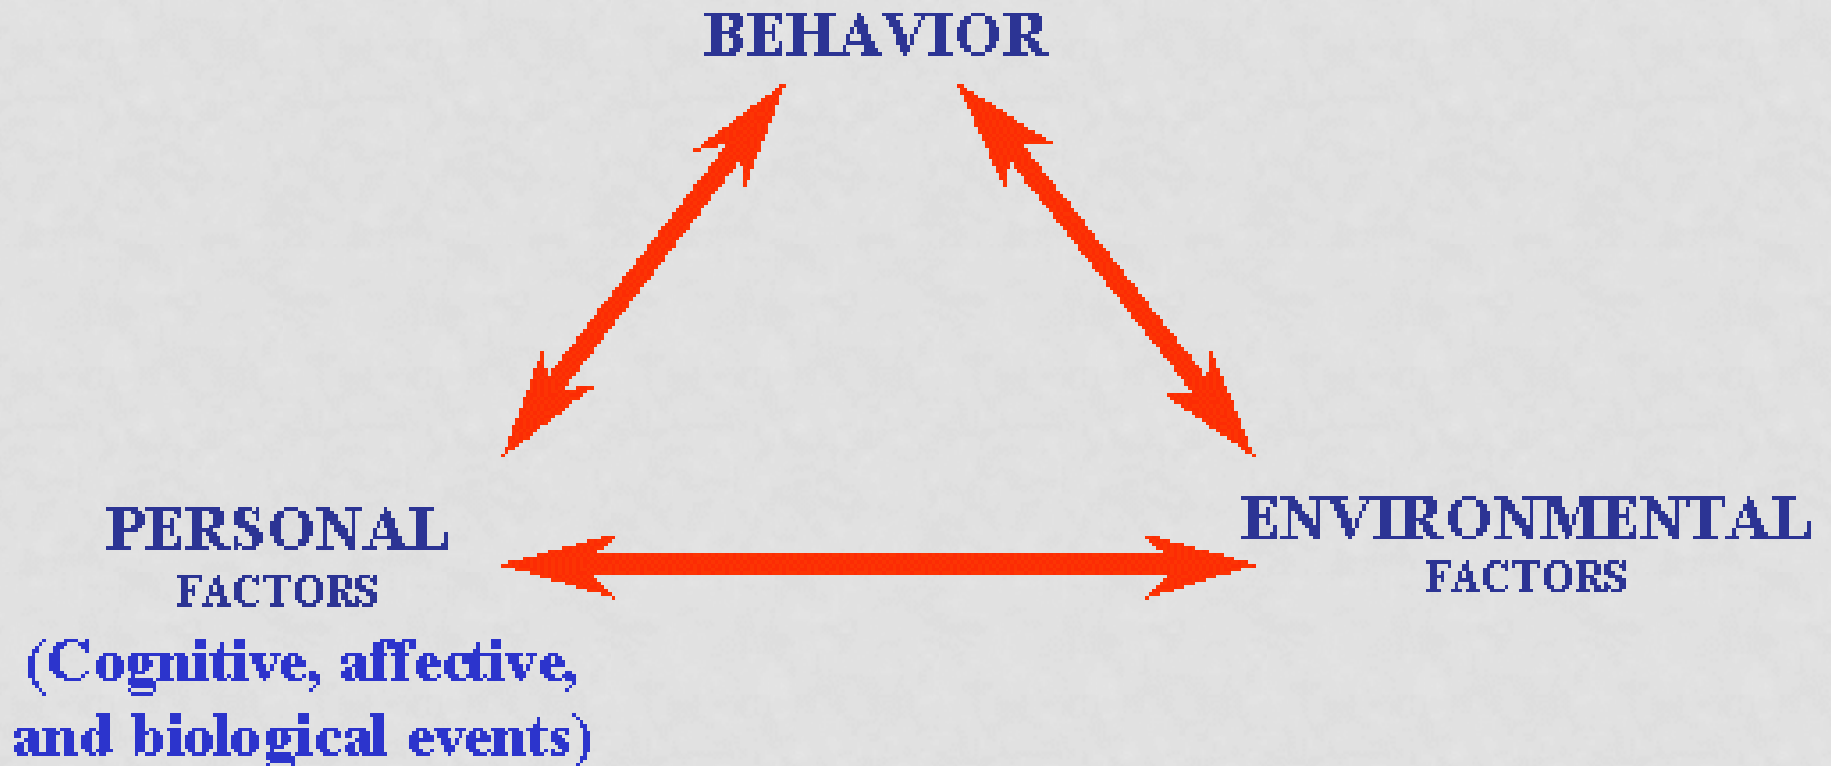

Social Cognitive Career Theory

- What is Self-Efficacy?
 - “Whether you think that you can or that you can't, you are usually right.”
 - <https://www.youtube.com/watch?v=gpGjexZcJdg>

LEARNING THEORIES

Social Cognitive Career Theory

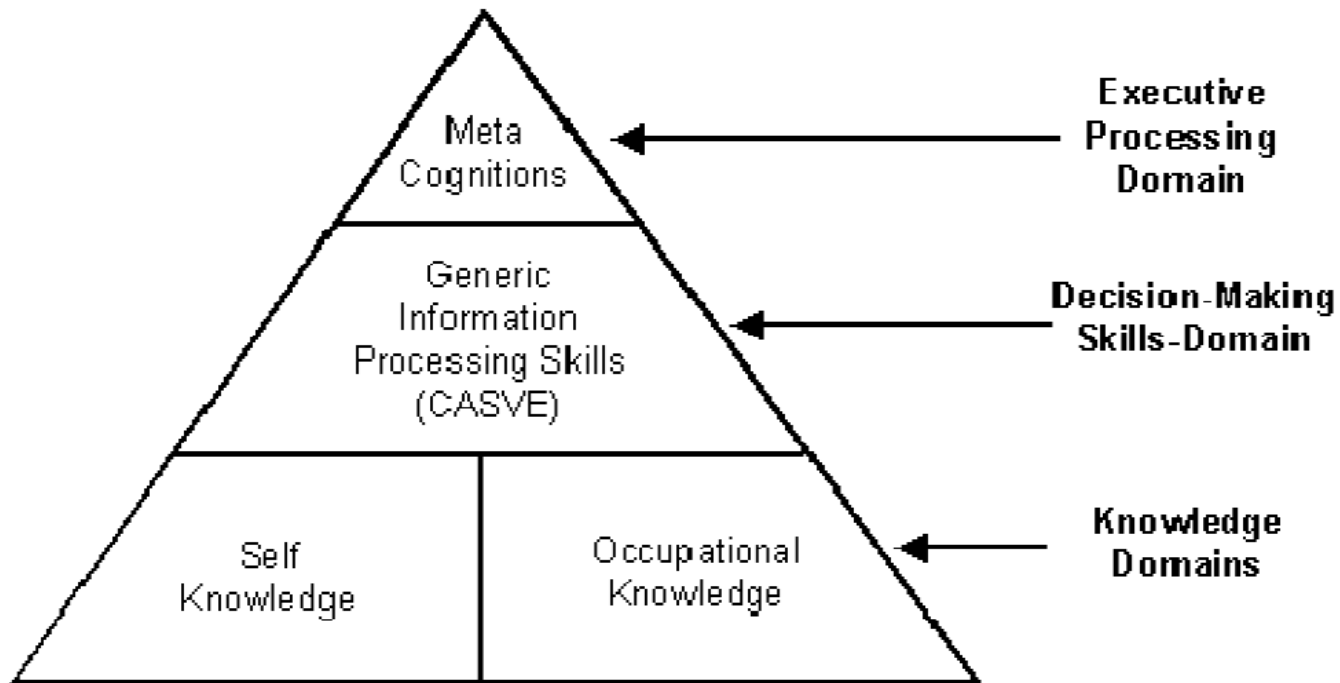

LEARNING THEORIES

Career Information-Processing Model of Career Choice

- How individuals engage in career problem solving & decision making.

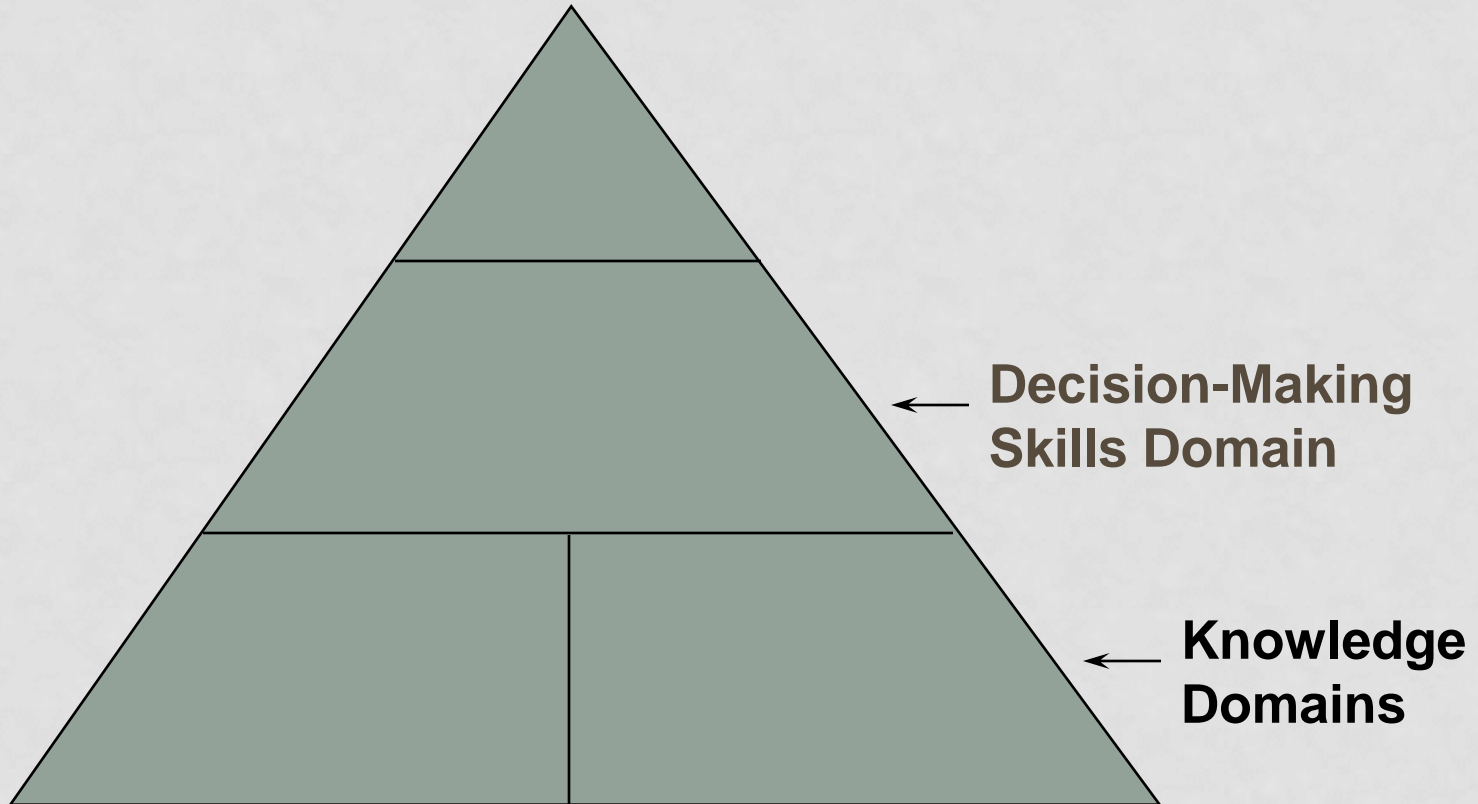

The CIP Pyramid is below:

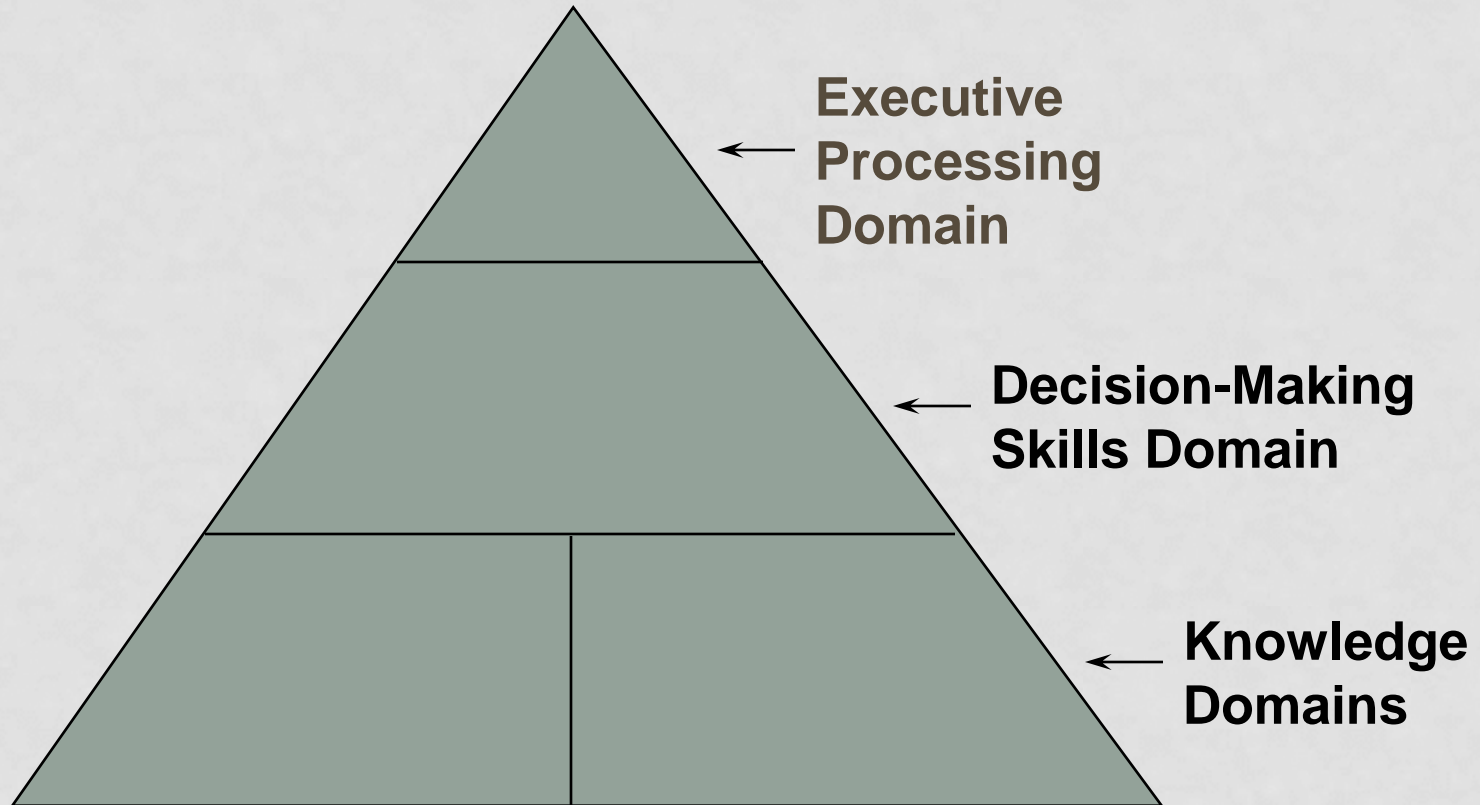

CIP Pyramid (Model)

CIP Pyramid (Model)

CIP Pyramid (Model)

CIP Pyramid (Model)

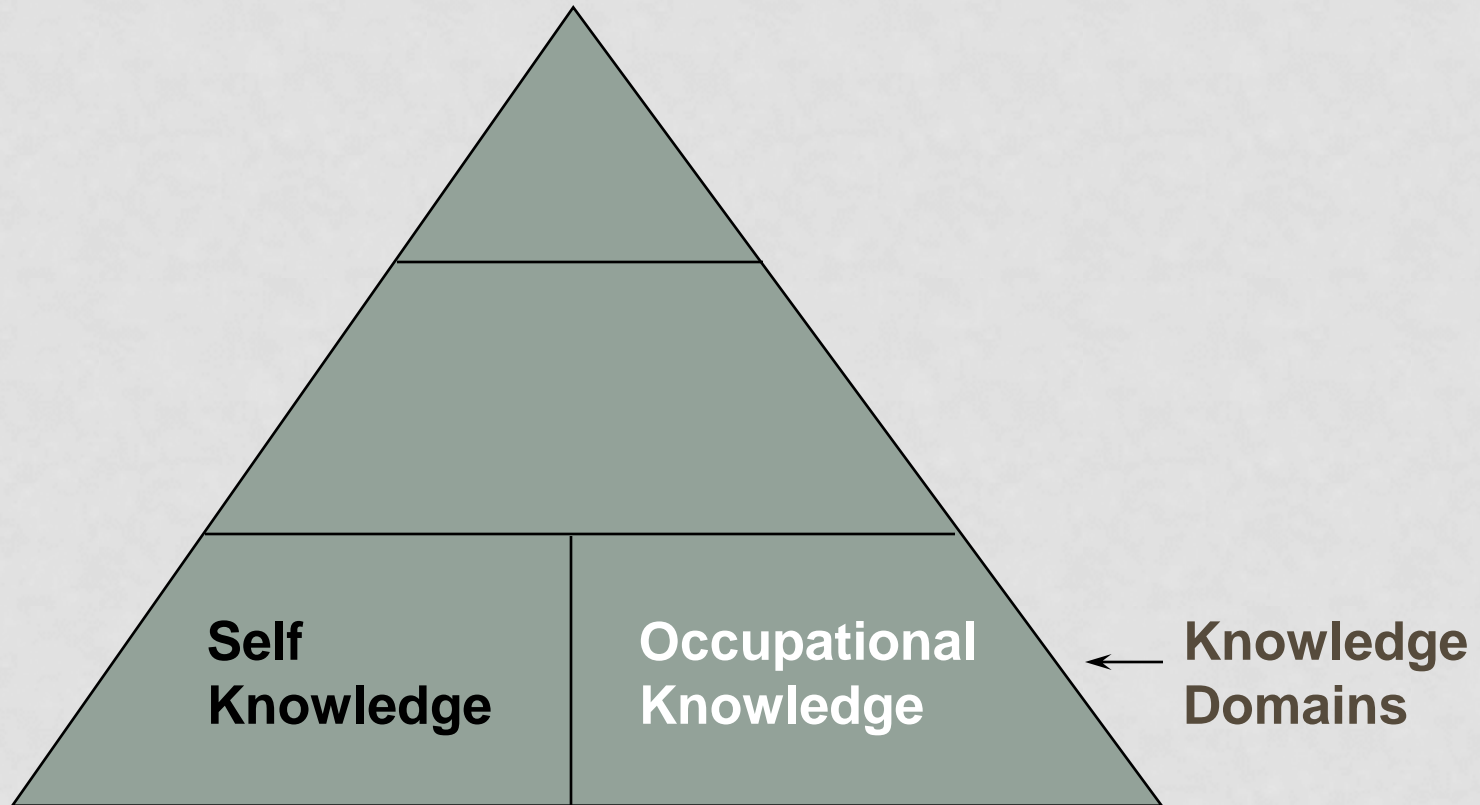

CIP Pyramid (Model)

SELF-KNOWLEDGE

- Values, interests, skills, and employment preferences are influenced by
 - Personal characteristics
 - Life experience
- Values, interests, skills, and employment preferences may be influenced by
 - Religious or spiritual beliefs

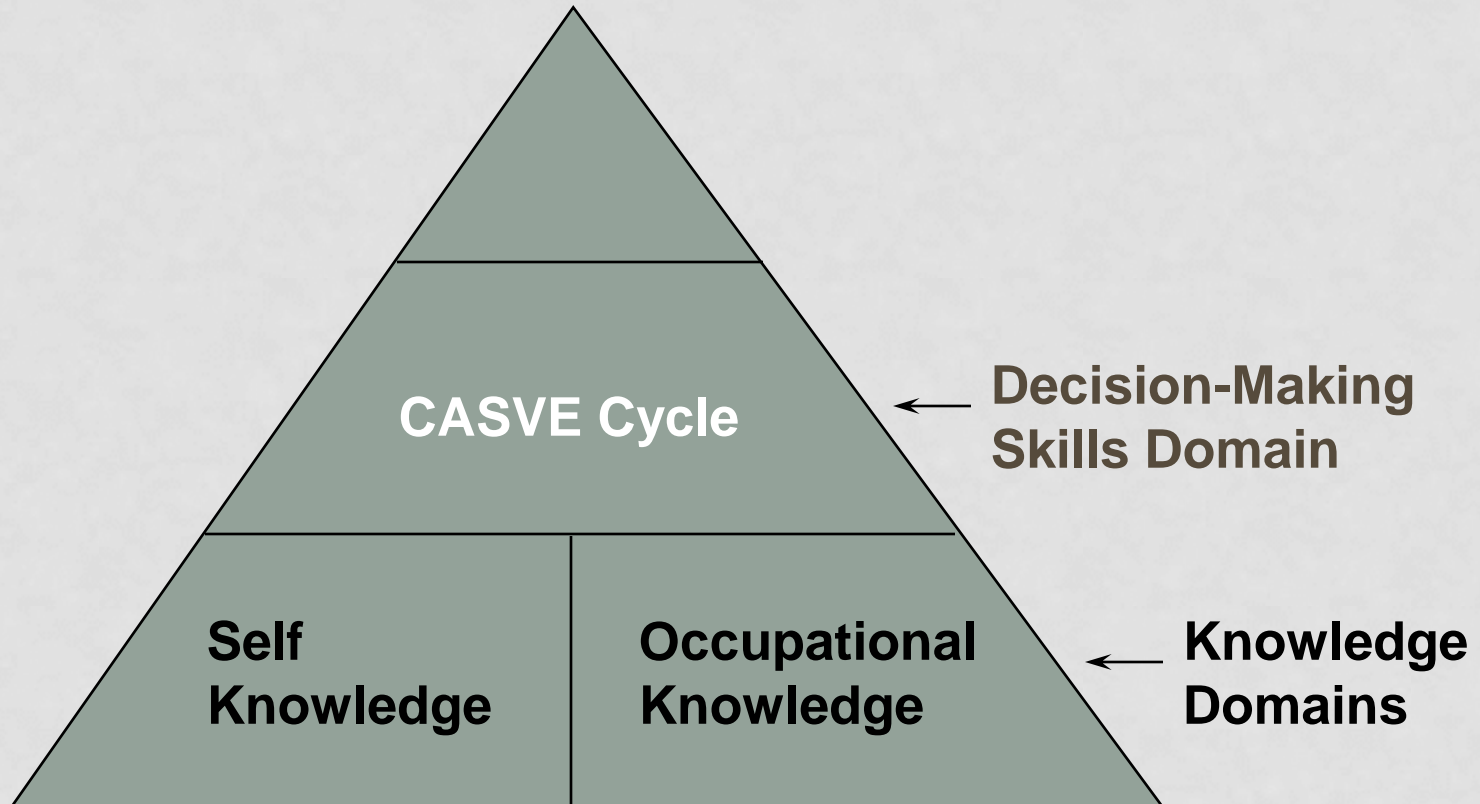

CIP Pyramid (Model)

OCCUPATIONAL KNOWLEDGE

- Also known as “knowledge about careers”
- Knowledge of specific options
 - Direct experience or observing others
 - Expands over time

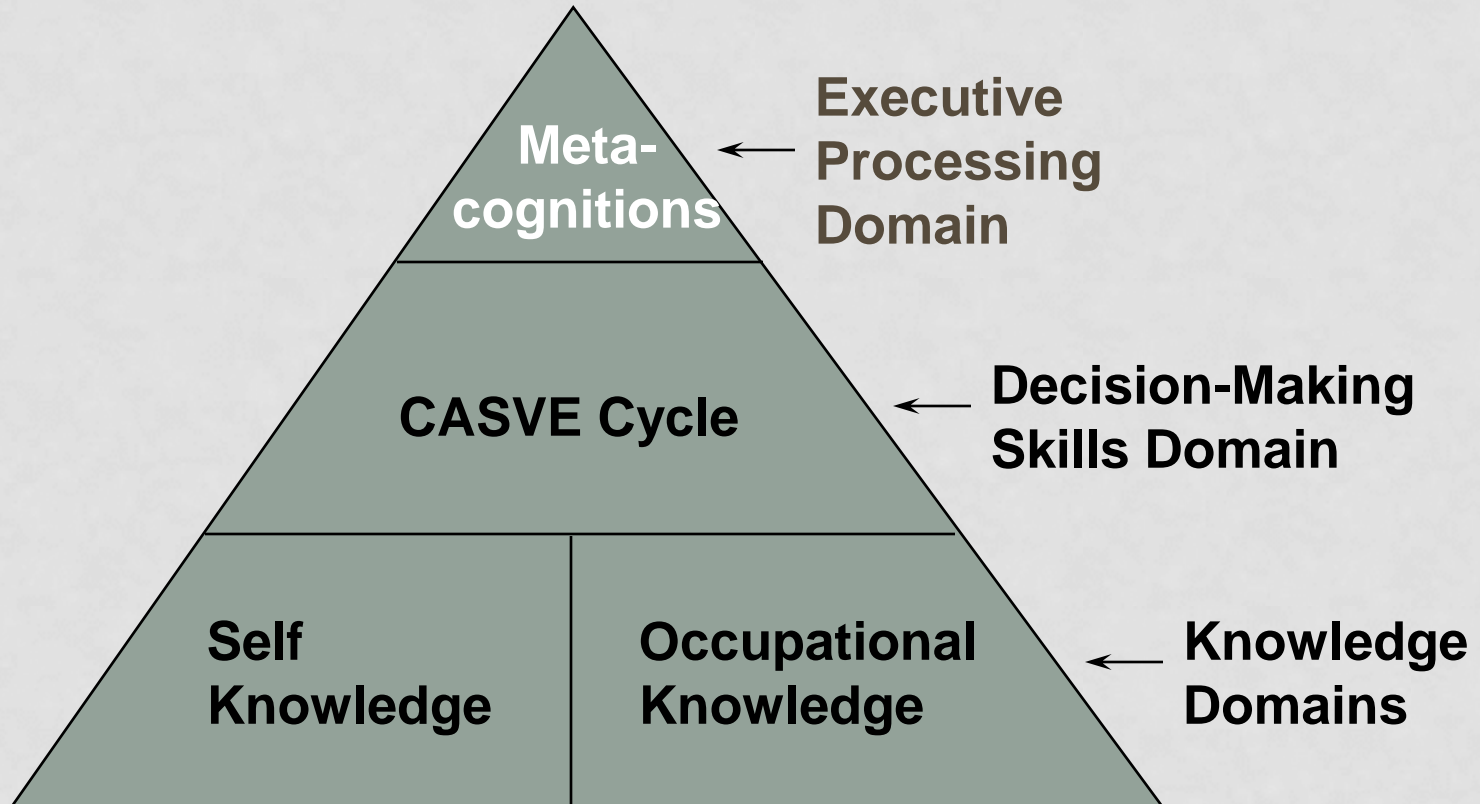

CIP Pyramid (Model)

DECISION-MAKING SKILLS DOMAIN

- Generic information processing skills that individuals use to solve important problems and make decisions
- The CASVE cycle is one model
- How do I usually make important decisions?

CIP Pyramid (Model)

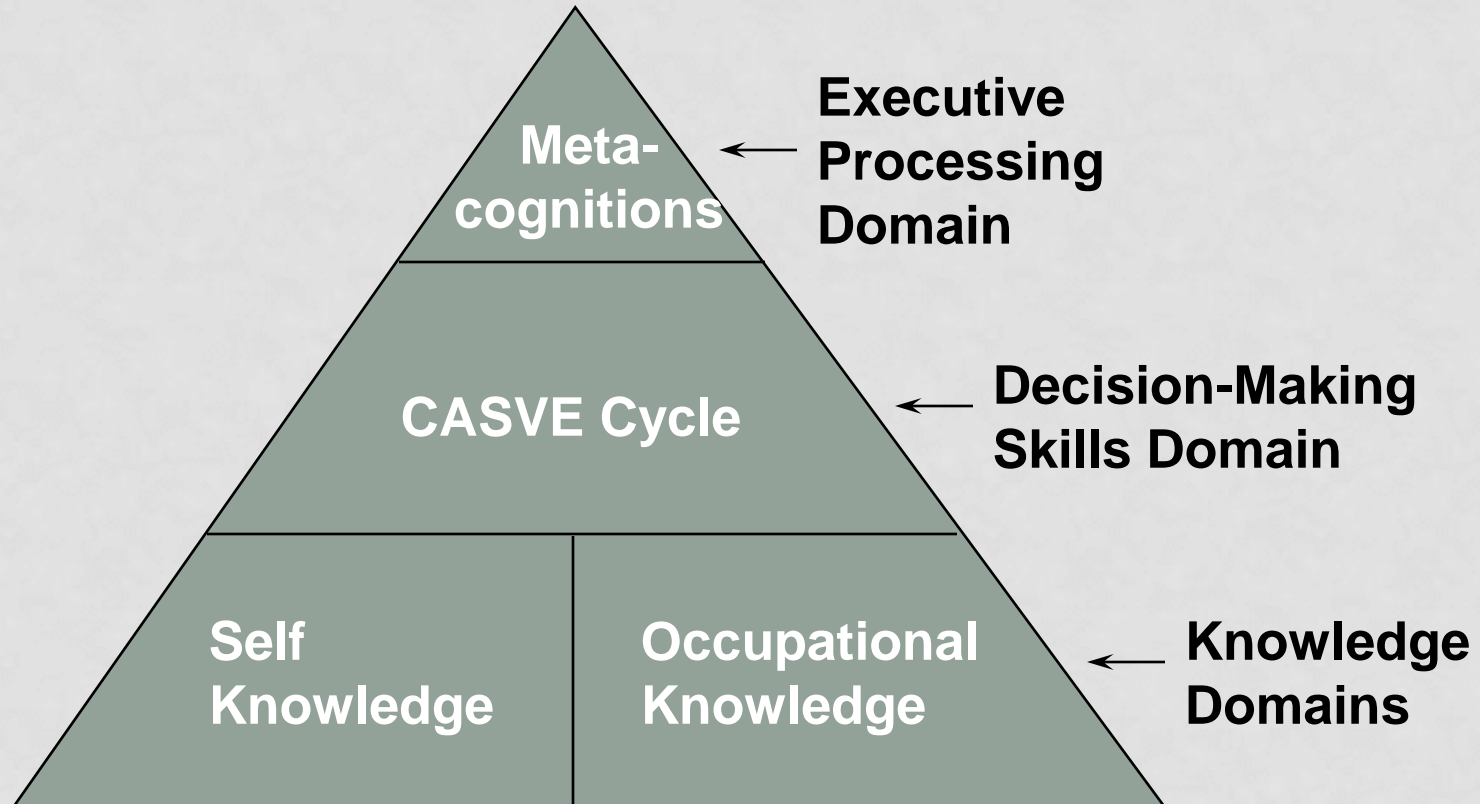

EXECUTIVE PROCESSING DOMAIN

- **Metacognitions**

- Monitoring/Evaluation part of thought process
- “How is it working?”
- “What would improve it?”
- “What adjustments could/should I make?”

PYRAMID OF INFORMATION PROCESSING DOMAINS (CIP MODEL)

CIP Pyramid (Model)

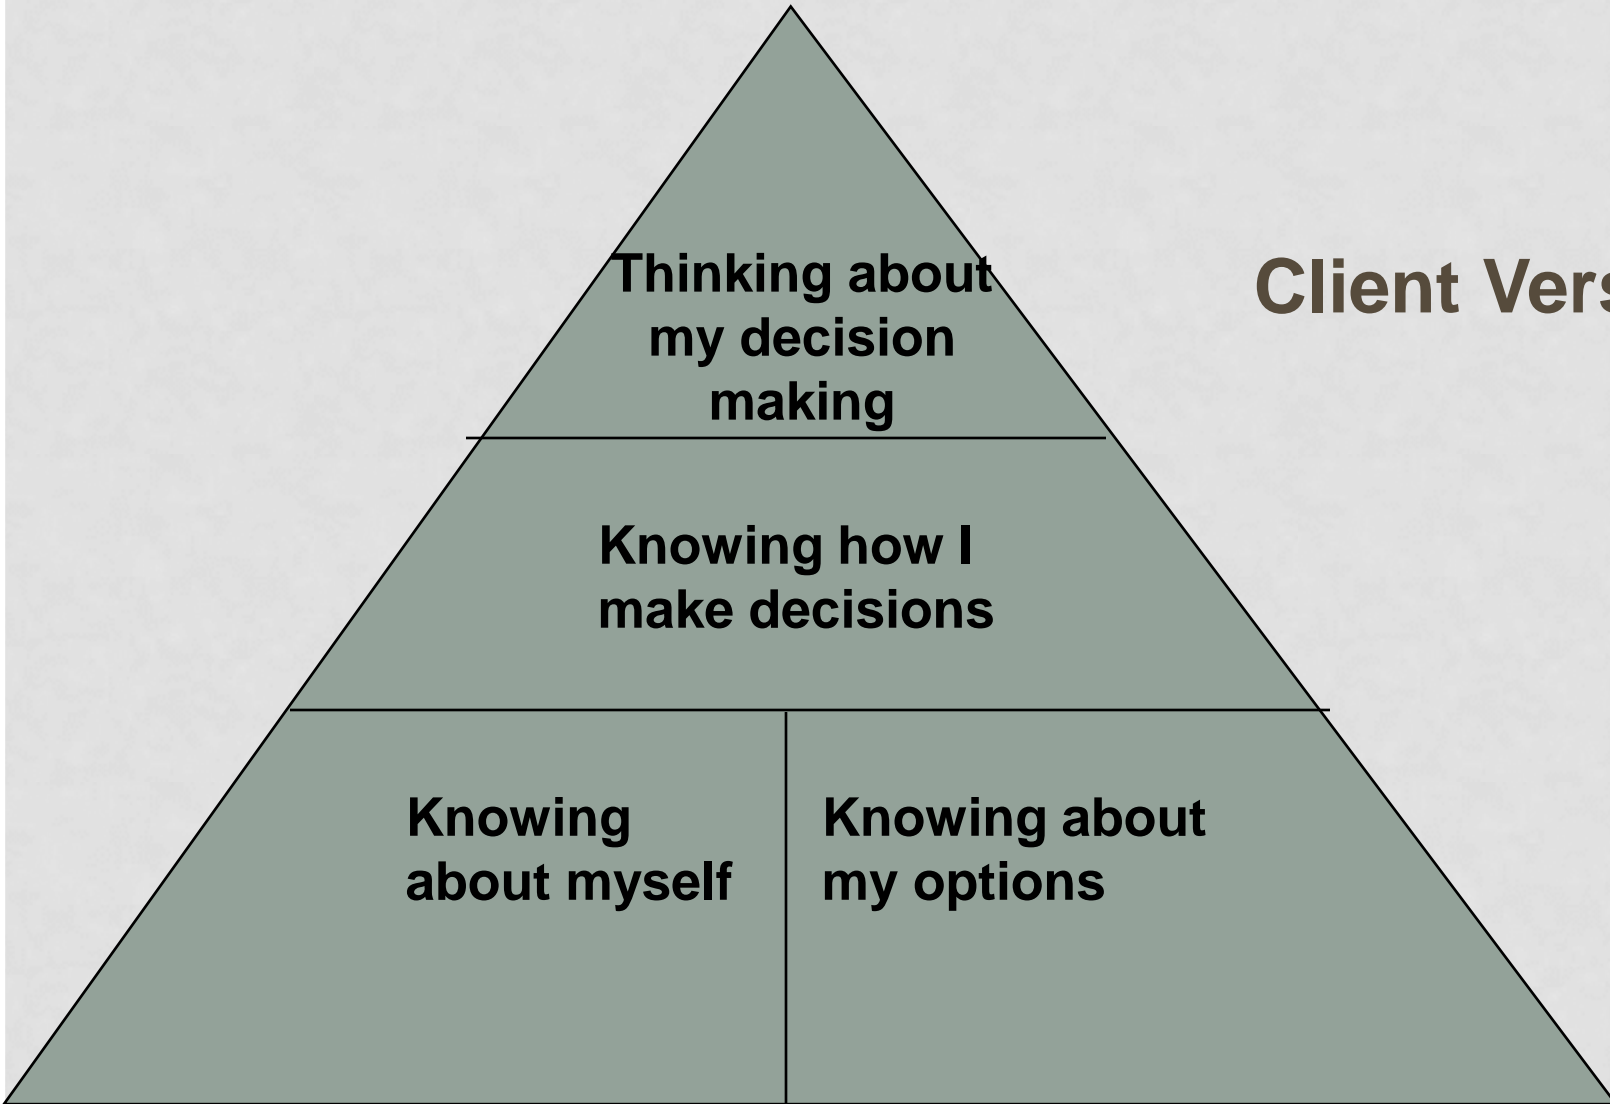

Client Version

**Thinking about
my decision
making**

**Knowing how I
make decisions**

**Knowing
about myself**

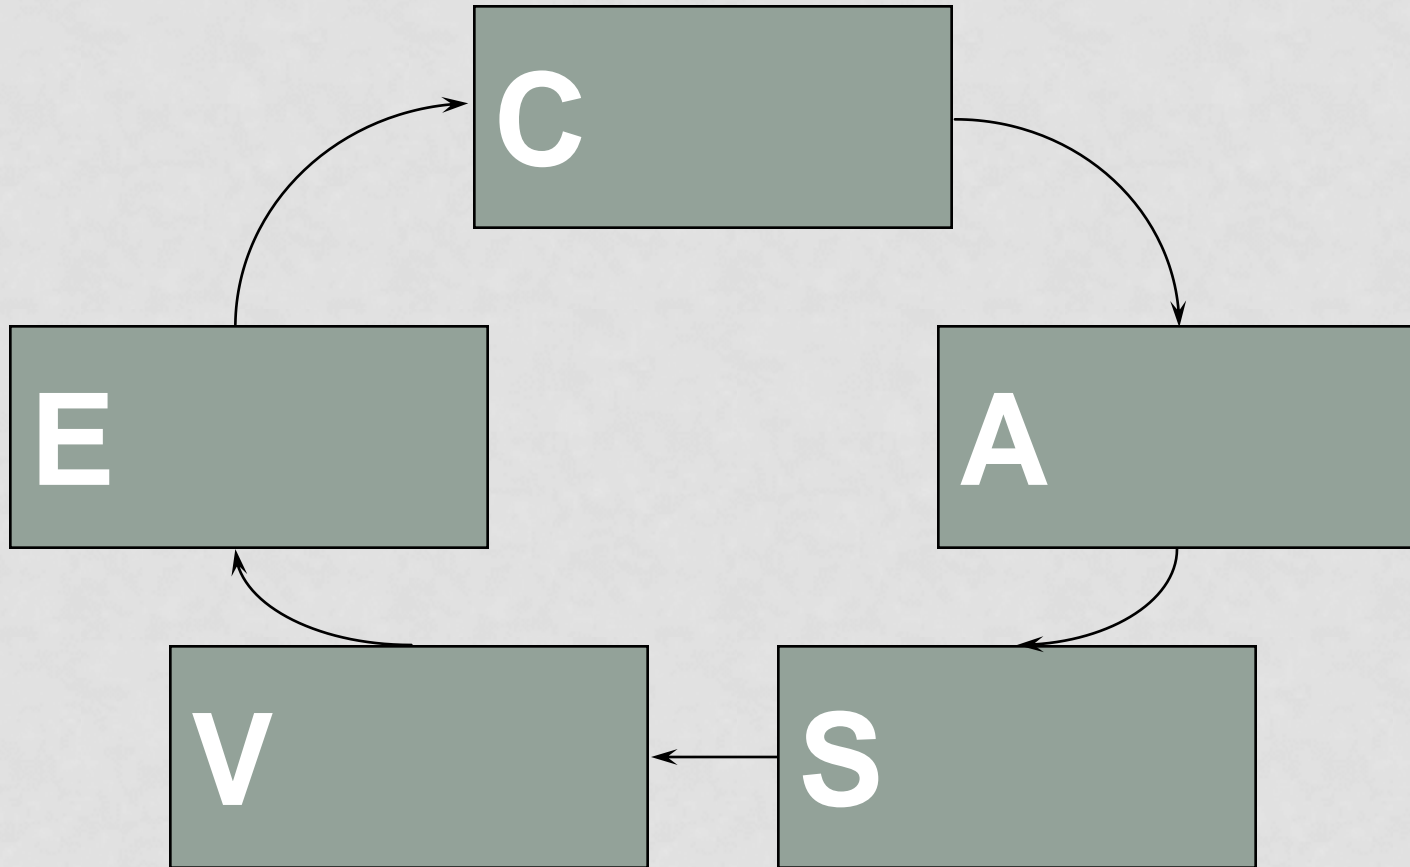

**Knowing about
my options**

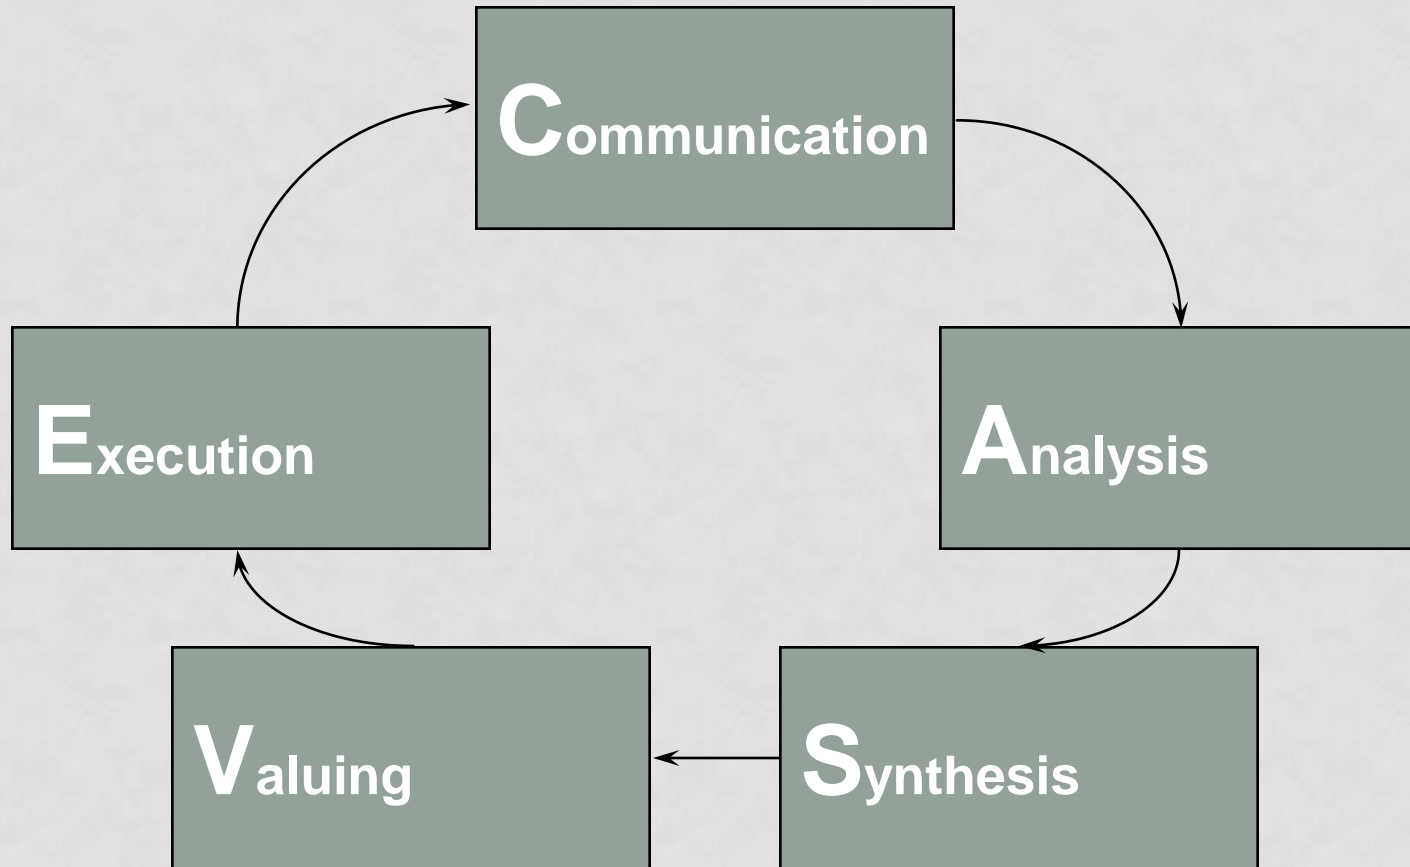

The CASVE Cycle

Understanding -
“How to make a career choice”

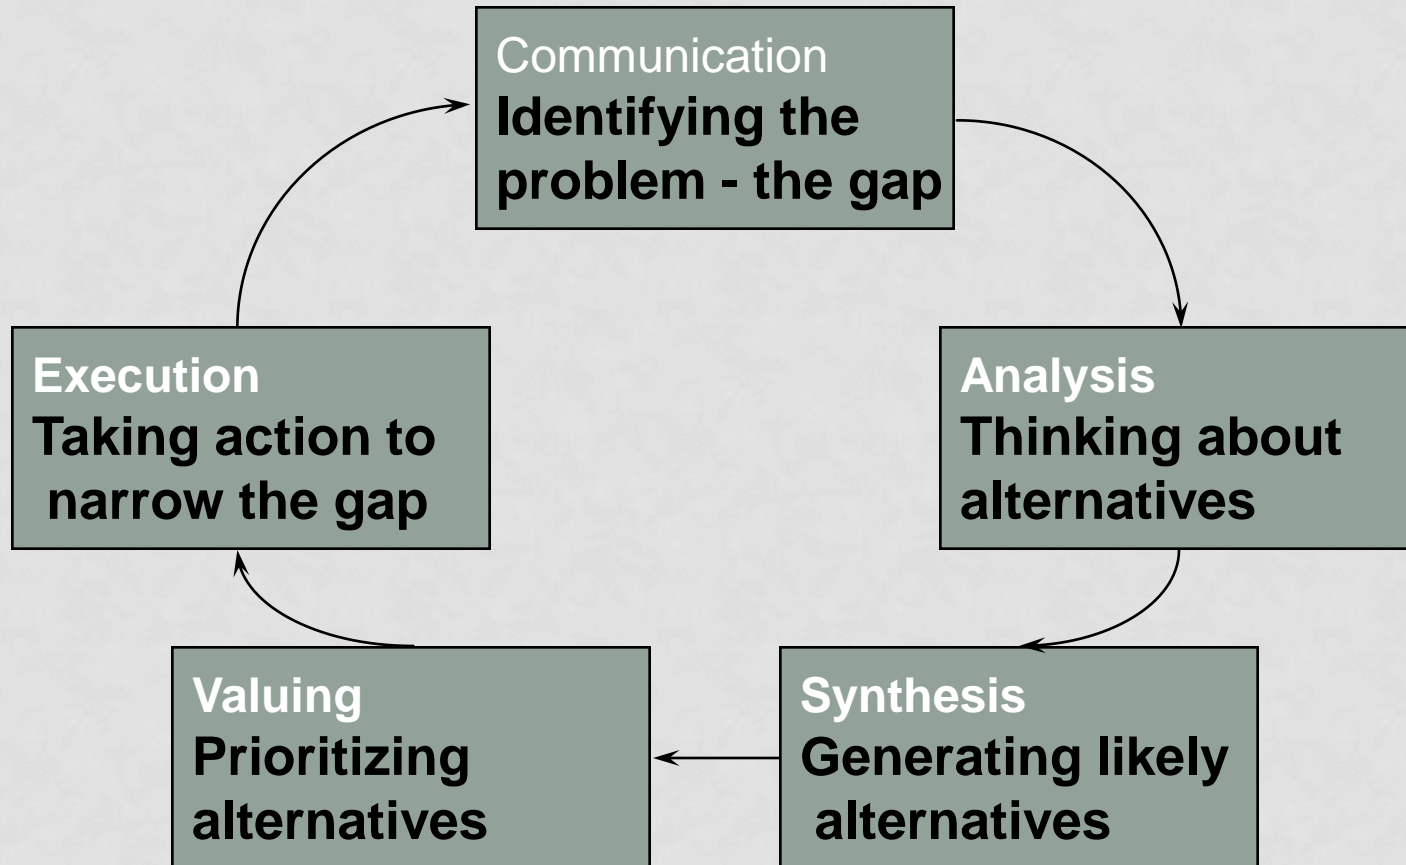

CASVE CYCLE

CASVE CYCLE

CASVE CYCLE

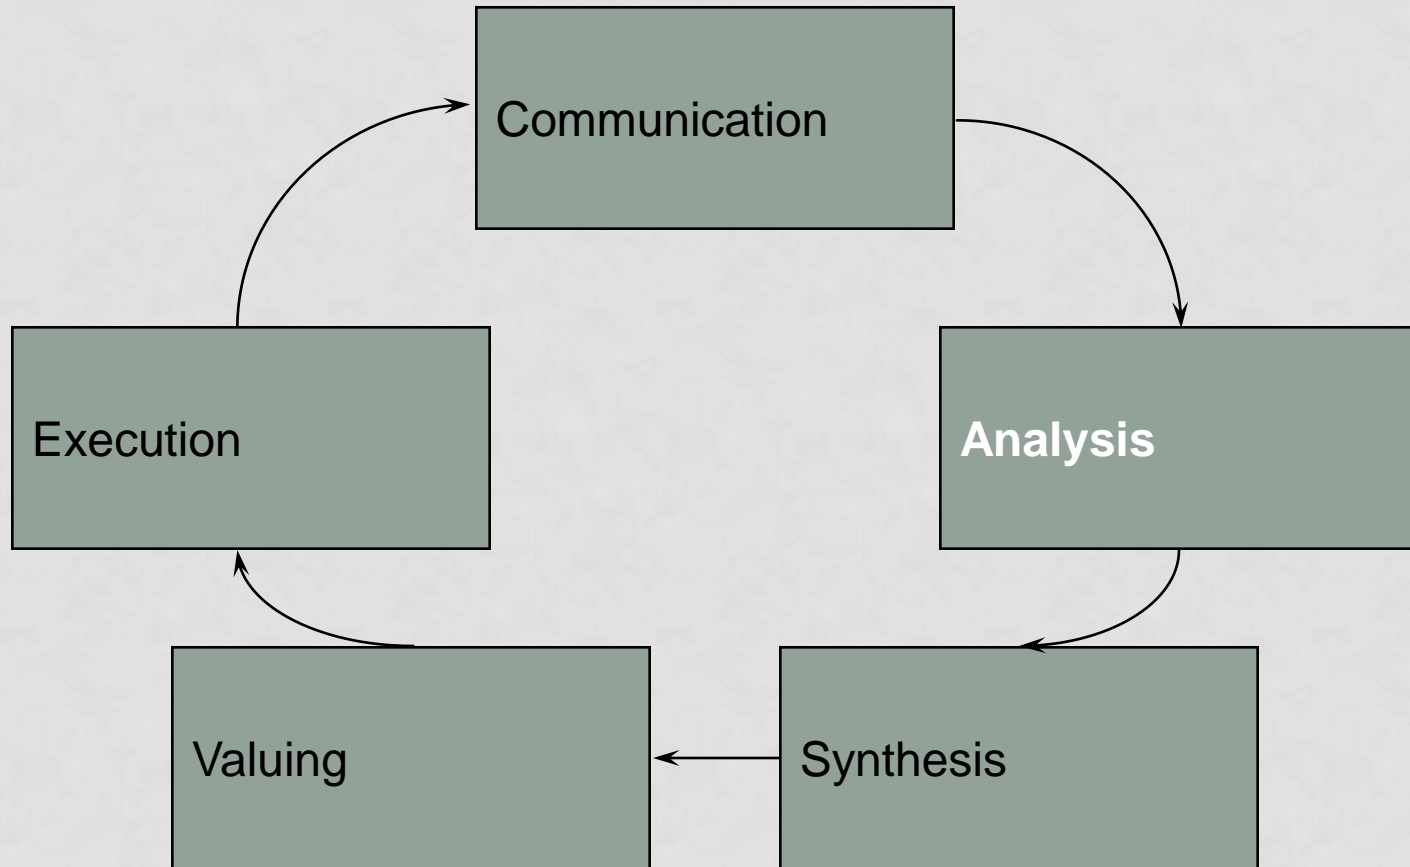

CASVE CYCLE

COMMUNICATION

- Acknowledging a problem exists
- “Knowing I need to make a choice”

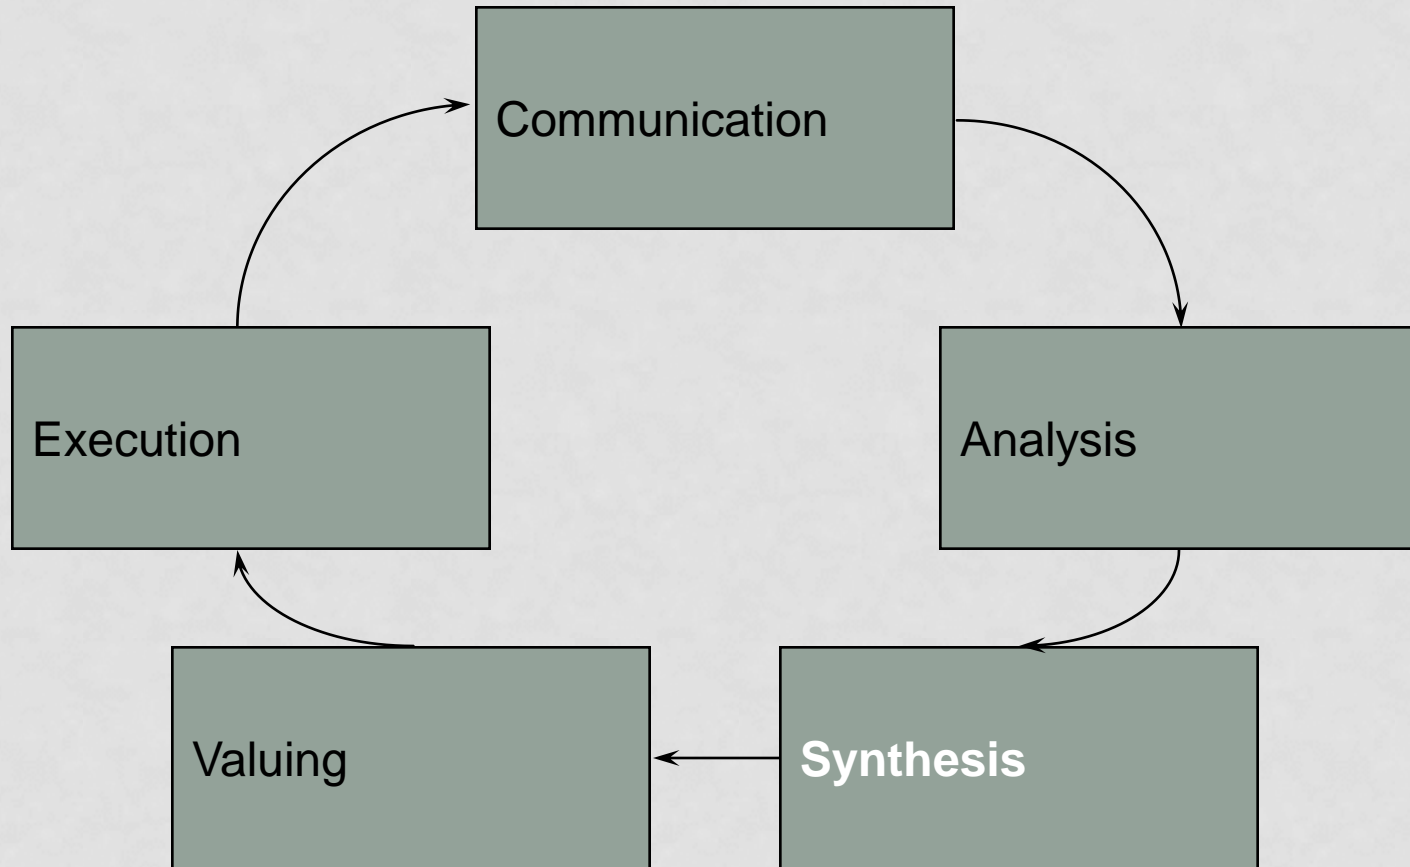

CASVE CYCLE

ANALYSIS

- Determine the aspects of the problem
- “Understanding myself and my options”

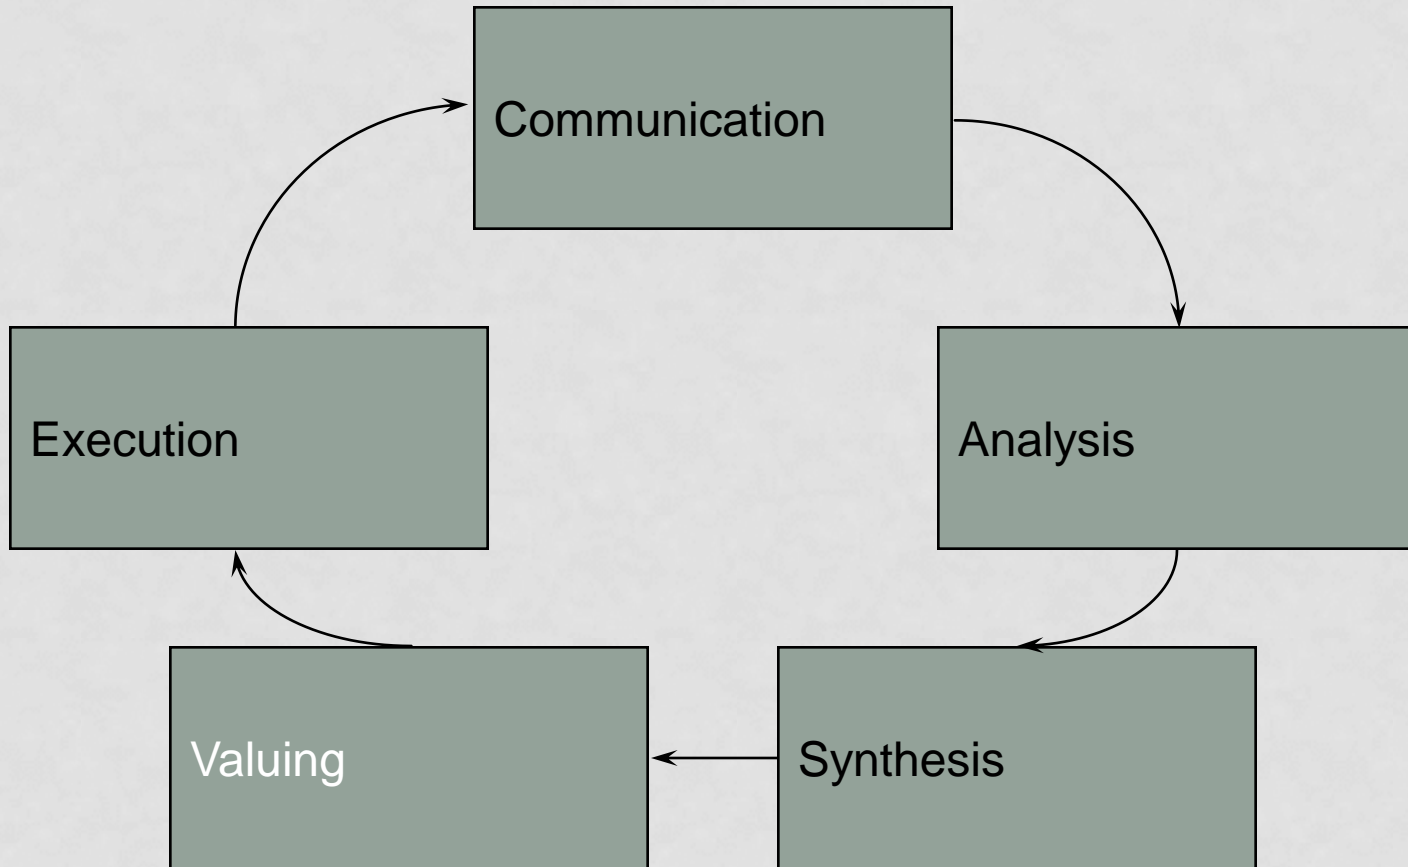

CASVE CYCLE

SYNTHESIS

- Generate potential solutions & identify realistic options
- “Expanding and narrowing my list of options”

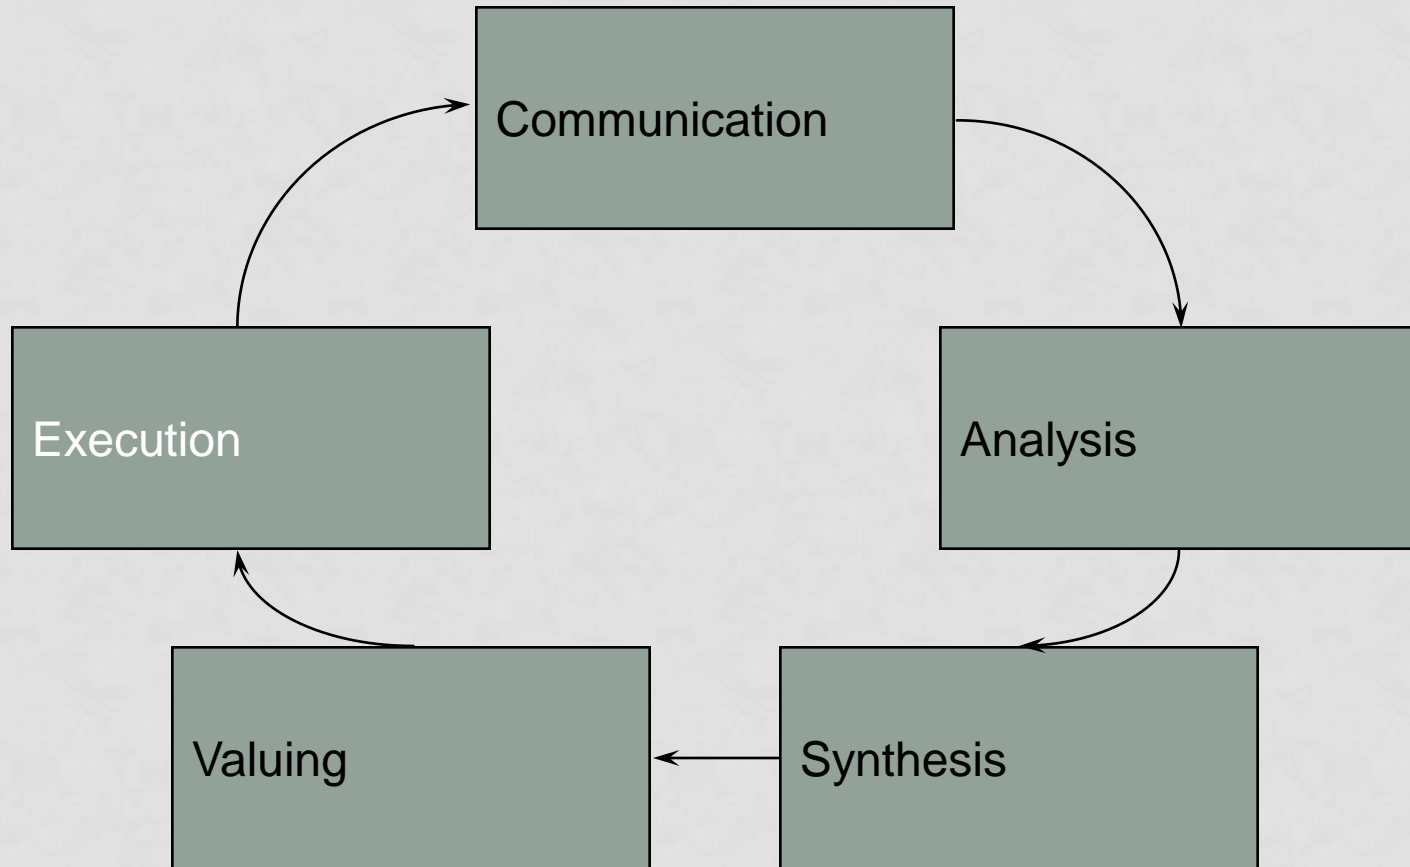

CASVE CYCLE

VALUING

- Costs/benefits analysis is conducted based on the values system of the individual.
- “Choosing an occupation, program of study, or job”

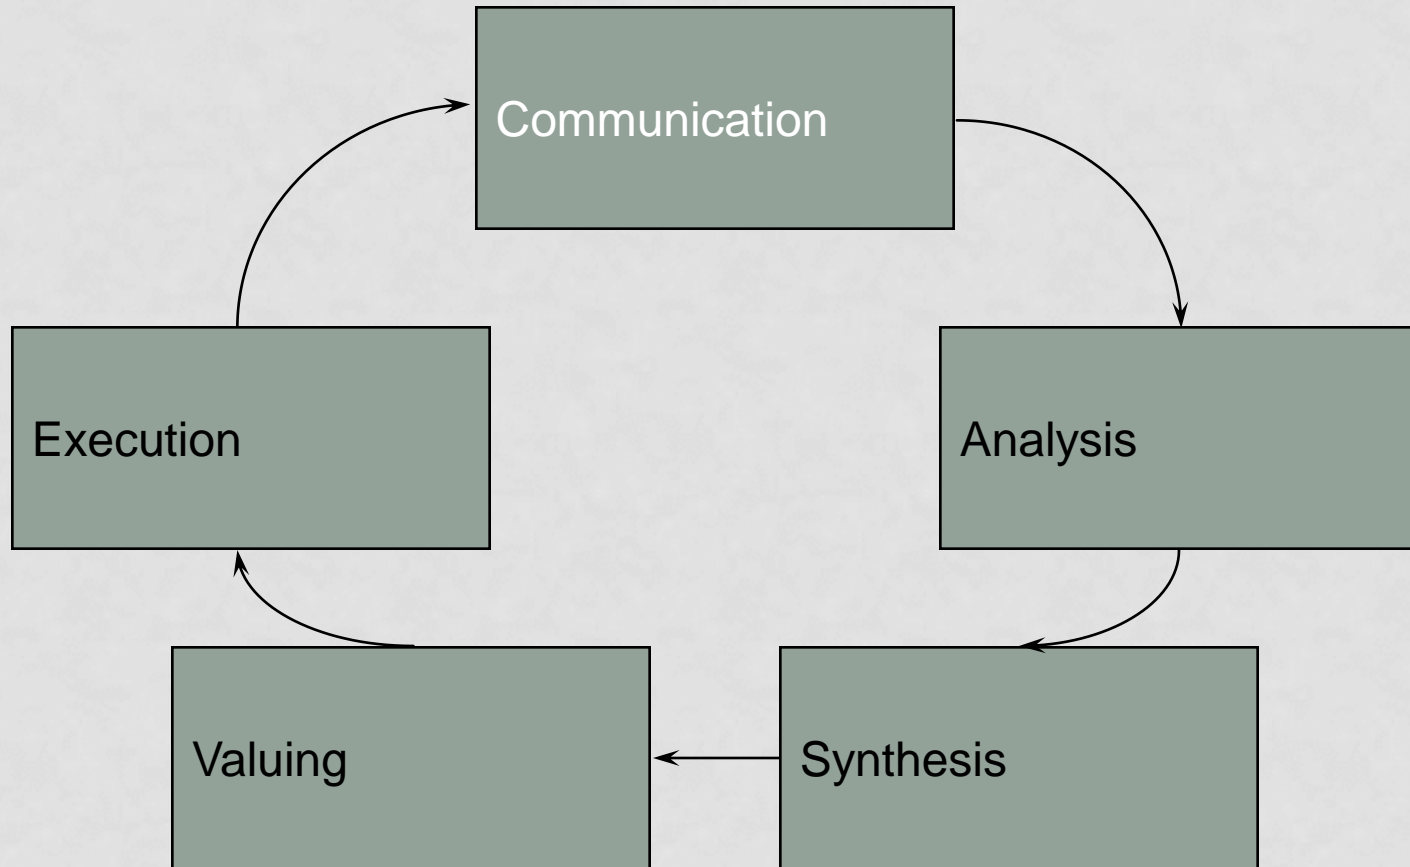

CASVE CYCLE

EXECUTION

- Plans developed and executed
- “Implementing my choice”

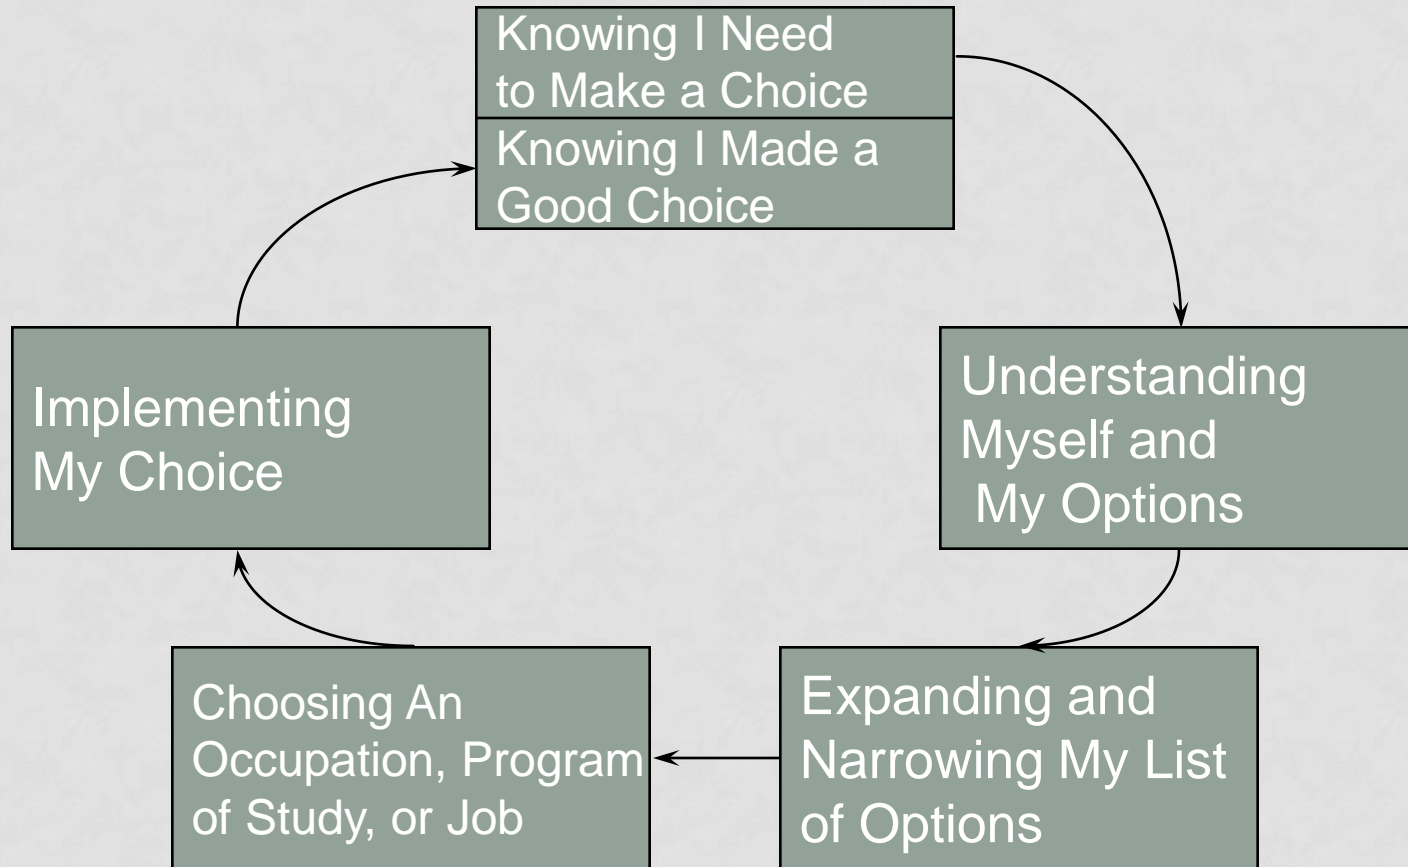

CASVE CYCLE

COMMUNICATION

- Knowing I made a good choice

CASVE CYCLE - CLIENT VERSION

LEARNING THEORIES

Career Information-Processing Model of Career Choice

- Career counselors:
 - a) Assess student readiness to learn, engage, and explore
 - b) Take complexity factors into consideration

Best Practices to Employ in Using CIP-Based Processes to Assist Students in “Getting In,” “Getting There,” and “Getting Through”:

1. Use of **Motivational Interviewing (MI)** techniques
2. Use of **Narrative Counseling** and selective **assessment** techniques
3. Identification of “**red flags**” and **referral for services**
4. Creation of **mentoring** and **whole-school support models**

POSTMODERN THEORIES

Contextualist Theory of Career

- You can only understand an individual is in the context of their own environment.
- To understand you must:
 - 1) Start with the event
 - 2) Determine individual's view of it
 - 3) Proceed from that point
- Career counseling
 - Get client to narrate nature of the problem
 - Assist to reinterpret the problem
 - Extend into the future

POSTMODERN THEORIES

Chaos Theory of Career Development & Spirituality

- Everything in the world is connected and nonpredictable.
 - 1) Move freely between career paths
 - 2) Career is a fractal and we are all interlinked through a network
 - 3) Careers range from orderly to chaotic
 - 4) People hope for the best when in transition
 - 5) Careers make sense through nonlinear logic

POSTMODERN CAREER COUNSELING

- Perspectives:
 - 1) Assisting clients construct a future career
 - 2) Encouraging more narratives from the client
 - 3) Assessments not necessarily employed
 - 4) Interpretation (making sense) of the clients experience is essential
 - 5) Counselor must provide a values-free perspective

SOLUTION-FOCUSED BRIEF CAREER COUNSELING

- Brief, constructivist, positively framed, future-oriented, collaborative inquiry that is respectful of client diversity and contextual differences
- 1) Relationship development
 - Client controlled, counselor is the facilitator
 - 2) Client presentation of issue
 - Focus on positive and the future
 - 3) Search for exceptions
 - Search for strengths

SOLUTION-FOCUSED BRIEF CAREER COUNSELING

- 4) After exceptions are found
 - Which of these strengths will help you achieve the goal
- 5) Develop a plan and scale the goal
 - Client restates the goal and scales it
- 6) Follow up sessions
- 7) Ask second order questions
 - What is the career problem is not addressed?

SOCIOECONOMIC THEORIES

- Greater emphasis on factors outside of the control of the individual.
 - Socioeconomics status
 - Discrimination & occupational segregation
 - Labor market considerations

SOCIOECONOMIC THEORIES

STATUS ATTAINMENT THEORY

- Family status and cognitive variables combine and influence educational attainment, which impacts occupation attainment and earnings.

SOCIOECONOMIC THEORIES

DUAL LABOR MARKET THEORY

Core Firms

- Well developed career paths
- Opportunities for upward mobility
- Dominant roles in the market

Peripheral Firms

- No long term commitment to employees
- Paid by the job
- Furloughed when no longer needed

SOCIOECONOMIC THEORIES

RACE, GENDER, & CAREER

- Data continues to show occupational segregation

THEORIES OF DECISION MAKING

```
graph TD; A[THEORIES OF DECISION MAKING] --> B[Prescriptive Models]; A --> C[Descriptive Models];
```

Prescriptive Models

How decisions
ought to be made

Descriptive Models

How decisions are
actually made

THEORIES OF DECISION MAKING

MODELS

Mitchell's Model

- Absolute constraints
- Negative characteristics
- Positive characteristics
- Neutral characteristics

Vroom's Expectancy Model

- Valence (preference) and expectancy (choices)

Tversky's Model

- “Elimination by aspects”
- Career aspects that failure to meet your personal minimum standard are eliminated

Janis & Mann's Model

- Decision making is a state of conflict producing uncertainty and stress.
